Polyps Dataset Codebook

Source: This data set is from a study published in 1993 in the New England Journal of Medicine,

F. M. Giardiello, S. R. Hamilton, A. J. Krush, S. Piantadosi, L. M. Hylind, P. Celano, S. V. Booker, C. R. Robinson and G. J. A. Offerhaus (1993), Treatment of colonic and rectal adenomas with sulindac in familial adenomatous polyposis. New England Journal of Medicine, 328(18), 1313–1316.

This dataset is derived from and improved upon from polyps and polyps3 in the {HSAUR} package, which divides up the dataset to different times, neglects the NAs, and does not include participant IDs. Consulting the original paper was quite helpful in reconstructing this dataset.

Codebook

variable	position	Variable_Label	units	Codes	type
participant_id	1	Participant ID			character
sex	2	Sex		male, female	factor
age	3	Age	years		numeric
baseline	4	Number of Polyps at Baseline			numeric
treatment	5	Treatment Assigned		sulindac, placebo	factor
number3m	6	Number of Polyps at 3 Months			numeric
number12m	7	Number of Polyps at 12 Months			numeric
